Caroli

Caroli is a versatile, easy-to-use lift with electrically powered lifting motion. Caroli helps residents and carers in many different, day-to-day living situations, for example:

- transfers between bed and wheelchair
- lifting someone who has fallen to the floor
- lifting in the bathroom.

Caroli has many advantages compared to similar home-care lifts on the market. For example, the lift column can be set at three different height positions, enabling lifting from the floor as well as to very high beds or gurneys. Caroli is very easy to manoeuvre and spares the carer from heavy and dangerous manual lifts.

CAROLI ACCESSORIES					
Universal Sling			Hygiene Sling

Capella

Capella is an electrically powered sit-to-stand lift, designed for people who have difficulty getting up. Capella raises the resident from sitting to fully standing in a comfortable way and without strain on the carer.

When standing, the resident can be moved, for example to the bathroom, where undressing is easily performed while in the lift. The lift is very easy to manoeuvre and spares the carer from heavy and dangerous manual lifts.

Capella is also appropriate for standing training, which strengthens the skeleton and stimulates circulation.
