

Gripping aids

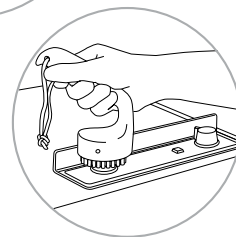

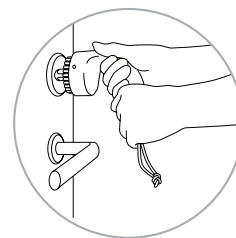

The Uni universal turner has an angled handle to provide a power grip which increases the turning ability.

The Contour pen is specially designed for people with difficulties in gripping. It lays comfortably in between the thumb and index finger.

Uni universal turner

The Uni universal turner is specially designed to make small, day-to-day tasks easier, such as turning on taps, opening/locking doors or switching on the cooker, dishwasher or washing machine.

The Uni has a comfortable handle which allows the user to grip with both hands. The hexagonal pegs provide a good grip thanks to the large gripping area.

The Uni universal grip has many uses.

Contour pen

The Contour is a lightweight pen for people suffering from rheumatism. It is gently rounded, making it pleasant and comfortable to grip.

The pen rests comfortably at the base of the thumb. Thereby preventing point pressure and strain on the index finger. Its ergonomic design facilitates for users to write for longer periods.

The Contour pen has a gently rounded handle.

The Contour rests comfortably at the base of the thumb.
