

Reachers

Aktiv reachers facilitates reaching and gripping for people with impaired arm and hand function, thanks to the light weight and the ergonomically designed handles. The jaws can both open wide as well as lift the smallest item. They are available in a number of models to suit various requirements: Reacher, Reacher with power grip and hook, and Reacher with hook. All models have a magnet in the handle to help you pick up metallic objects.

Reacher, 70 cm

Reacher, 45 cm

Reacher Aktiv

The handle is angled to utilize the strength in the hand and provide an effective grip. There is an index finger support on the handle which gives improved precision. The entire gripping surface of the jaws is coated with hardwearing rubber, ensuring plenty of friction, which also reduces the amount of strength required. The jaws of the reacher can also be set in two positions. This means that the reacher can be used both horizontally and vertically having to turn the arm. This reacher is available in two lengths, 45 and 70 cm.

Description	Item no.
Reacher, 70 cm	8050 5003
Reacher, 45 cm	8050 5004

- Material:** Handle, key and jaws: Polycarbonate/ABS
