

Tango walker

The Tango cross-folding walker is our most exclusive model. The Tango stands upright and takes up very little space when folded. It is thus very easy to store and transport.

Third-generation walker

The Tango is the safest walker on the market thanks to our patented Etac Braking System™, where the braking mechanism is protected in the tube. There are no cables to catch or tangle, and even after several years of use the same small amount of effort is required to brake the Tango walker. The brakes are automatically adjusted when the height of the walker is adjusted.

Description	Item no.
Tango with basket	15 05 01 02-14
Tango with basket, tray and backrest	15 05 01 08-14

Dimensions:	
Total width:	60 cm
