

Swift freestanding toilet seat raiser

Like other products in the Swift family, this freestanding toilet seat raiser is designed with functionality and simplicity in mind. Swift freestanding toilet seat raiser is height adjustable. The height can also be set one step lower at the front to have a slightly angled seat. The splash guard is built into the seat and the armrests are detachable. The product is of course delivered flat-packed.

Easy handling

The Swift freestanding toilet seat raiser is easy to assemble, handle and clean. The light weight makes it easy to move, and it can be brought directly to the shower for easy cleaning. To further facilitate cleaning, the splash guard is built into the seat with a smooth, easy-to-clean surface. To assemble and adjust the height of Swift freestanding is easy as no tools are needed.

Multiple functions

Besides the toilet function, it may also be used as a shower stool. The flexible, yet stable construction allows all four legs to stand firmly even if the floor is uneven. The seat of Swift freestanding can be set slightly angled (maximum one step lower at the front). This option makes it easier for the user to stand up from the toilet seat raiser. The armrests may easily be removed if necessary.
